Introduction

To support the Danish export-oriented business community and mitigate risks related to the green transition, the Danish Government has allocated funds to support mature green solutions by a Danish company or Danish Company Alliances, with the ambition to pave the way for an economic recovery that can contribute to sustainable investments in the green transition.

The Green Accelerator Facility is an initiative launched in October 2020 as part of a political agreement to reboot Danish exports based on the recommendations from Danish businesses. The purpose of the Facility is to increase Danish green exports. More specifically, it will support the preparatory work for green projects with export potential, but which are yet to find the right structure and format. The Green Accelerator will contribute to the financing of i) preparatory business activities and ii) secondments and short term visits of Danish advisers and experts, including the posting of financing advisers to selected Danish representations abroad to support maturation of projects with potential for Danish exports. This Application Guide describes the application procedures for the Green Accelerator's financial support related to i) preparatory business activities.

The objective of the Green Accelerator is to help Danish companies take the crucial steps into new markets by providing financial support to mature Danish export solutions, which have a ready foreign market. Danish companies can make a significant contribution to reigniting growth in the Danish export market by stimulating sustainable growth and employment opportunities in Denmark and abroad.

The financial support per project can be between DKK 300,000 and 5,000,000. Company Alliances that apply for financing of their projects can do so without all companies in the alliance applying for financial support. After completion of the project. The Facility will reimburse 70% of expenses incurred in the case of a single company applying and 80% of expenses incurred in the event of a Company Alliance. No advance payment will be made.

The Green Accelerator will help Danish companies address the key barriers to enter new markets by providing financial support to pay for services and related hardware necessary to realise the export order.

What is the Green Accelerator?

The Green Accelerator will support Danish Companies or Company Alliances, consisting of large, small and medium-sized companies, and contribute to the financing of consultancy services which will enable the export of mature green and sustainable Danish solutions. Only proven technologies and solutions beyond proof of concept stage can receive support through the Green Accelerator. This Facility follows EIFO's general assessments of export transactions, including e.g. that export transactions follow the UN guiding principles for human rights and business (UNGP).

The maximum financial support per company is DKK 2,250,000 and DKK 5,000,000 for the entire Company Alliance (when not conflicting with EU's "De Minimis state aid" regulation). Upon completion of all project activities and submission of a final completion report. The Green Accelerator will reimburse 70% of expenses incurred in the case of a single company applying and 80% of expenses incurred in the case of a Company Alliance applying.

The Facility will not pay any advance payments. Once a grant amount is approved, no additional funds will be made available. The Company or Company Alliance will be responsible for ensuring that the completion of the project happens within the agreed budget and timeframe. All taxes and duties must be borne by the Company or Company Alliance, and shall not be financed from the grant awarded. The total expected amount available under the Green Accelerator is DKK 85 million. The Facility will be operational until the funds are exhausted.

The overall objective of the Green Accelerator is to provide financial support to already mature Danish export solutions, thereby supporting Danish companies in their final push to enter new foreign markets. **The expected impact** is the attainment of new export orders amounting to DK 1.400 million and the creation of 850 Danish jobs.

**Who can apply
for support?**

The Green Accelerator is open for Applications from Danish companies or Company Alliances that consist of companies registered in Denmark. To qualify, the Danish companies must meet certain minimum requirements related to their financial and technical capacities.

The minimum requirements pertaining to the applicant company or overall Company Alliance are:

- › In case of a single applicant, the applicant company must be registered in Denmark and must be an SME
- › In case of a Company Alliance, all companies must be registered in Denmark, of which one must be a SME
- › A Company Alliance must appoint a lead company registered in Denmark, which will be the focal point for the project vis-à-vis EIFO. In case of a single Company, this company will take on such responsibilities. The companies which form a part of the alliance will all be equally liable for the fulfilment of the potential contractual obligations if entering a Grant Agreement with the Green Accelerator.

The minimum specific requirements for the applicant company or the companies which form part of a Company Alliance are:

- › Any company applying (as a single company or as a part of an Alliance) must have been registered in Denmark for at least 3 years
- › Any company applying (as a single company or as a part of an Alliance) must be able to document at least five full-time equivalent staff according to a company annual audited report for the most recent financial year
- › Any company applying (as a single company or as a part of an Alliance) must be able to pass an initial ESG screening and Reputational Due Diligence by EIFO
- › The single company applying or the lead company of an Alliance must be able to document turnover greater than DKK 10 million according to company annual audited report for the most recent financial year
- › The lead company must be able to document export volume greater than DKK 5 million in the most recent financial year

The following supporting documents are required to be submitted with the application:

- › In case of a Company Alliance, a Memorandum of Understanding between the companies forming the alliance (no formal requirements to content or format)
- › Audited company annual report for the most recent financial year for the single company or Company Alliance members (all companies part of the alliance). If revenue and export revenue are not stated in the annual report, separate documentation providing this information must be submitted.
- › Declaration confirming that the support is not conflicting with EU De Minimis principles

The following supporting document is optional:

- › Sustainability Policy from the company or each company forming part of the alliance

What can the Facility support?

The Green Accelerator will reimburse 70% of the total project budget in case of a single company applying and 80% of the total project budget in case of a Company Alliance applying. The maximum reimbursement can be DKK 2,250,000 per company or DKK 5,000,000 for the entire Company Alliance, if applicable. It is assumed that the applicant has a mature solution ready to go to market, which means

that the proposed project must be an export opportunity already developed and tested by the Company or Company Alliance. Initial market studies and analyses cannot be financed under the Green Accelerator. There are no geographical requirements, but it is considered an advantage to apply for support in countries where Denmark already has an established strategic sector cooperation.

Eligible project activity costs:

Refundable Expenses	Description
Consultancy Services to address identified gaps / bottlenecks	Studies and Analyses
	Technical reviews / feasibility studies
	Market analyses
	ESG review, conformance and compliance review
	Legal reviews and advice
	Advice on patent applications (not the patent application itself)
	Training and Capacity building
	Capacity building, awareness creation and peer-to-peer knowledge exchange
	Site visit for identified customer(s) and key decisionmakers
	Advocacy and Marketing
	Mapping of relevant decision-makers / actors
	Contact with relevant decision-makers / actors - events
	Monitoring of relevant administrative / political initiatives / legislation
	Preparation and execution of local advocacy campaigns related to the green solution
	Awareness creation related to the green solution such as export promotions, trade fairs, workshops, demonstrations, campaigns in the targeted export market
Project Management	Internal project management related costs shall not exceed more than 10% of the <u>total budget for the project</u> .
Travel and Accommodation	Economy class. According to Danish government rules (Cirkulære om satsregulering pr. 1. januar 2024 for tjenesterejser).
Auditor Expenses	Auditor expenses related to final disbursement. The Request for Disbursement must be submitted to the Danish company's auditor for examination
Products (hardware / software / design / equipment)	Costs associated with the purchase or inclusion of products directly related to approved project activities (studies and analyses, training and capacity building and advocacy and marketing) shall not exceed more than 30% of the total budget for the project. If the products included in the budget are sold by companies within the alliance or closely associated companies, then the equipment has to be traded at cost price. Profits or development costs are thus not to be included.

The Facility cannot financially support (the list below is not exhaustive):

Non-Refundable Expenses	Description
Wage costs	Wage costs of the Danish single company or companies in the Company Alliance (exception is project management costs – maximum 10% of the project budget)
Normal, direct sales promotions	Ordinary sales and marketing
Operating costs / Auxiliary costs	Expected to be covered by the participating stakeholders
Per diem costs	Expected to be covered by the participating stakeholders
Regulatory procedures	Implementation of regulatory procedures in connection with construction cases, environmental approvals and the like
Infrastructure and patents	Construction, Infrastructure, approval of patents and similar

Financial support from the Green Accelerator is subject to the European Union’s “De Minimis state aid” regulation, which allows for aid of maximum EUR 300,000 to be provided from public funds to any business enterprise over a rolling three-year period. Companies applying for support must submit a Declaration confirming that the support through this Facility is not conflicting with the EU State aid regulations

The minimum requirements for the Project Activities are:

- › The solution must be considered “Green” based on the Green Accelerator definition (see section “How do we define Green Solutions?”)
- › Development stage (maturity) of the solution, including the technology, should be proven and ready to go to market
- › All project activities must be completed within 12 months of the project’s start date and must commence within 6 months from the time of grant commitment
- › The project is expected to generate export volume 10 times the grant value within 24 months from the time of project start
- › Additionality in some form is a requirement. The Applicant must be able to argue why the project activities in the described form would not be implemented without support from the Facility.
- › The solution must be able to pass an EIFO ESG Screening

- › Service Providers (consultants) contracted to perform the project activities will be screened for compliance and business integrity standards
- › Solutions must not have a significant adverse effect on Climate Change Mitigation, Climate Change Adaptation, Blue Economy (i.e. sustainable use and protection of water resources and the ocean), Transition to Circular Economy or Protection and Rehabilitation of Biodiversity and Ecosystems
- › The creditworthiness and risk of the export country/ countries will be screened, taking into consideration the proposed project activities and the export solution. Please consult the following link for further information. Please note that a high risk country classification does not necessarily mean that your application will be disqualified: [Green Accelerator \(eifo.dk\)](https://www.eifo.dk)

The following supporting documents will be required to submit:

- › Declaration confirming that the support is not conflicting with EU De Minimis principles

The following supporting documents are optional to include to demonstrate the likelihood of an export sales order:

- › Letter of Intent from potential Customer(s)
- › Letter from a relevant Danish representation in the countries i.e. Embassy and consulate, confirming that the solution is aligned with strategic engagement by Danish government

Financial support from the Green Accelerator is subject to the European Union's "De Minimis state aid" regulation, which allows for aid of maximum EUR 300,000 to be provided from public funds to any business enterprise over a rolling three-year period.

How do we define Green Solutions?

The solution is aligned with one or more of the following criteria constituting the Green Accelerator's definition of green solutions (A, B and C - based on the EU Taxonomy and Denmark's Green Future Fund). As part of the application, the Company Alliance must provide supporting material on how their solution, service or product is aligned with one or more of the following criteria.

A. Green Solution:

- › Solutions which have the potential to reduce greenhouse gas emissions nationally and/or internationally, including the timing of the implementation of the Community
- › Solutions that can increase energy and resource efficiency throughout or parts of the value chain, such as through circular economy
- › Solutions that decouple the use of fossil fuels and fossil bases the materials throughout or part of the value chain
- › Solutions that promote, protect and/or support climate, environmental and natural conditions, including the use of water resources, biodiversity and other ecosystem services
- › Solutions to address food shortages and/or water scarcity and/or other climate, environmental and natural challenges in the food and water sector
- › Supporting solutions, including symbiosis and sector collaborations that enable or accelerate other green solutions.

B. Other Green Solutions. Solutions within other green transition areas such as:

- › Climate change adaptation
- › Blue economy projects, i.e. sustainable use and

- › protection of water resources and the ocean
- › Transition to circular economy
- › Protection and rehabilitation of biodiversity and ecosystems

C. Greener alternatives. Solutions greener than existing alternatives, replacing or substituting these. Examples include the following areas:

- › Measuring and testing instruments for green solutions
- › Renewable energy facilities
- › Carbon capture utilisation, Power to X technologies
- › Energy savings, including energy efficiency in buildings
- › Energy storage and energy regulation systems
- › Re-charging stations and recharging infrastructure
- › Electrifying personal transport
- › Recycling of rare metals
- › Reduced footprint for the food production industry
- › Industrial size biogas facilities with high share of (animal) waste
- › Reduced consumption of water and chemicals
- › Facilities to reuse certain raw materials and reuse of components

How to apply for support?

Applications for support should be submitted through the online SmartME platform. Applications submitted through other channels will not be accepted.

Submission Procedure:

1. Applicant checks the minimum requirements and the assessment criteria in this Application Guide
2. The single company or lead company responsible for the application registers on the online SmartME application system through the website: [Green Accelerator \(eifo.dk\)](http://eifo.dk)
3. The lead company creates and submits the Application in SmartME

General rules for submission

- › Applications received after the submission deadline will be rejected
- › Applications must be submitted online on the SmartME platform - no other form of submission is allowed
- › Applications shall be submitted in English
- › All financial information included in the Applications shall be in DKK
- › EIFO reserves the right to reject any Application until signing of the Grant Agreement.

SmartME

Detailed registration and submission guide for SmartME

The registration process on the SmartME platform is as follows:

- › Follow this link to register for the Call for Applications: [Green Accelerator \(eifo.dk\)](https://www.eifo.dk)
- › Register by providing your first and last name, email address and your chosen password as well as your location. You may also be required to provide a mobile number for authentication
- › An e-mail with login credentials will be sent to the registered e-mail address
- › Sign in to the system and begin developing your Application
- › Company Alliances can at any time log out of the system and return to the same access point as all work will be saved in real-time, as it is entered.

IT Support

Visit the Green Accelerator online management system (SmartME) helpdesk for technical problems. The SmartME helpdesk support function is located on the application page once the Applicant has logged into the system. The helpdesk responds to queries within 48 hours.

Data Protection

All data entered into the SmartME system is secure. All the operations and practices regarding the collection, storage and processing of personal information are in accordance with the EU Data Protection Directive 95/46/EC and the Danish law.

**How is the
Application
assessed?**

The total maximum score is 100 points. The Applications meeting the minimum requirements will be assessed against the following assessment criteria and corresponding maximum scores.

Single Company or Company Alliance (15 points):	
Number of SMEs forming part of the Company Alliance	Including <i>more</i> than one SME in the Company Alliance will be considered an advantage (please note that this is only applicable for Company Alliances)
Export Preparedness	It is considered an advantage if more than 50% of the single company or total Company Alliance turnover for the most recent financial year is export oriented
Project Activities and Solution (85 points):	
Preidentified customer	A specific customer (an existing legal entity) has been identified and has expressed interest in the product or solution offered by the Company Alliance. The creditworthiness and credit risk of the identified customer(s) will be assessed
Solution is aligned with strategic engagement by Danish government	Solution is aligned with strategic engagements by the Danish government on global markets (e.g. fits with Danish strongholds and with active engagement in the area by Ministry of Foreign Affairs or other Danish government agencies)
Market and business case	Potential of the market for proposed solution described.
Export Potential	Expected export volume compared to grant value, within 24 months from the time of grant commitment. The applicant must explain the likelihood of successfully securing the export order (commercial circumstances backed by the unique or important features of the product / solution), and how the export order will be distributed among the respective Company Alliance Partners, and potentially other Danish companies.
Purpose, Activities and Time schedule	Assessment of how the project activities will contribute or directly overcome the identified gaps or bottlenecks. Project content and probability for success
Risk mitigation measures	Project related risk assessment and mitigation measures
Project management capacity	Clear breakdown of responsibilities between each Alliance Partner during project implementation (only relevant for Company Alliances). Brief presentation of key staff profiles, and their respective roles in implementing the project. Analysis of how such project management constellation increases the chances of successfully securing an export order.
Capacity of Service provider(s)	Profile and experience of identified service providers to realise the activities.
Budget and financing	Project activities and expenses must be aligned. Budget size must be proportional to expected results. Risks and assumptions for major cost categories should be defined
Additionality of Facility support	Applicant must explain why the project activities in the described form would not be implemented without support from the Green Accelerator. If possible, the applicant should explain any potential long-term changes e.g. within the regulatory framework, standards, capacities, and perceptions caused by the project activities.

What are the requirements if your project receives a grant commitment?

- › As own contribution is considered 30% for single company grantees and 20% for Company Alliance, the disbursement of the Facility will be the reimbursement of 70% of the total project budget in the case of a single company grantee and 80% of the total project budget in the case of a Company Alliance. Full disbursement procedures will be made available to the selected Company Alliances/Grantees once the Grant Agreement has been shared.
- › Reporting consists of a mid-term progress report (2 pages) and final completion report (5 pages) to be submitted to EIFO according to the stated results and associated indicators in the Application (both quantitative and qualitative). A mid-term progress report is not required if the project duration is less than 6 months.
- › The Company Alliance will contribute to possible additional monitoring and evaluation (lessons learnt) events, stories, surveys, etc.
- › The completion process will include a final report, an audit report by an auditor, and a debriefing on project implementation.
- › EIFO reserves the right to conduct a sample audit / due diligence when deemed necessary.
- › The audit should be prepared in accordance with the organization: 'FSR - Danish auditors' by meeting their conditions for a statement with a high degree of assurance. Additionally, it is expected that the audit report clarifies how the grant is allocated within the alliance, as well as confirming the bank account information for the grant recipient.
- › The Company and/or the company alliance must adhere to the project duration timeline and the expense celling. In the case of an expense overrun of the overall project budget, the Grantee is required to cover the excess expenses from its own funds, which are considered as additional counterpart contributions.
- › The overall project budget must not be exceeded. Cost overruns within individual budget lines below 10% is acceptable without notification to the EIFO, as long as the overall project budget is not exceeded and as long as the budget is compliant with the overall guidelines for refundable expenses (i.e. less than 30% on products, less than 10% on project management costs).

**Where to find
additional
information?**

Glossary of key terms

Glossary of key terms

Term	Definition / Explanation
Assessment Criteria	Defined criteria used to assess and rank Applications
Company	Single entity applying for support
Company Alliance	Group of companies applying for funding, one of which must be an SME
Company or Company Alliance Contribution	Company or Company Alliance's own funds contributing to the realization of the Facility financially supported project
Due Diligence	Verification exercise to confirm the information submitted by Company Alliance
EIFO	Denmark's Export and Investment Fund
Eligibility Criteria	Defined minimum requirements to be fulfilled by an Application to be considered for funding
Entity	Institution, company, or organization that has legal rights and obligations
ESG	Environmental, Social and Corporate Governance
Facility Manager	Consultant in charge of managing the Green Accelerator
Grant Agreement	Contract signed between EIFO and the single company or lead company
Grant Beneficiary	Successful Company or Company Alliance which has signed a Grant Agreement with EIFO
Grant Committee	Committee that consists of representatives from EIFO which makes strategic decisions for the Facility, including grant awards for Applications
Grantees	Successful Company Alliances who have signed a Grant Agreement with EIFO
Grantor	Denmark's Export and Investment Fund
Reputational Due Diligence	Assessing and evaluating the reputation and integrity of the applicants to identify any potential risks or concerns related to the reputation of the company and project
Lead Company	Main entity heading the Company Alliance (if applicable)
Refundable Expenses	Expenses which can be financed through Green Accelerator financial support
Solution	The proposed business product or service to be exported
